

Service agreement

- Global Boiler Services offers our customers the benefit of a service agreement, which includes regular service visits onboard your vessel. Frequency of the visits depending on condition/vessel needs.
- During the visit we will check the boilers on all safety and operation functions. You will after the visit receive a full report concluding which state your boiler plant is in. Our SE will also collect all documentation available to ensure we can offer the best support possible.
- The final report will give you as a customer a full overview regarding spares, repairs and maintenance needed in the future for your boiler plant.
- Items checked during annual survey:
 - Feedwater control and alarm system checked.
 - Pressure control system checked.
 - Combustion checked and adjusted if necessary.
 - Alarms and warnings tested live o Burner inspected and cleaned.
 - Control valves and positioners checked and calibrated.
 - Control cabinets inspected.
- If it is time for Class Survey it could be beneficial to combine this with a service visit. The test will be completed by our Service Engineer in cooperation with Class.
- We will keep records of visited vessels and keep you informed when it is time for the next scheduled visit.
